Who are we

As part of the JCS Computing Group serving the IT industry for over 25 years, computerent.co.uk has firmly established itself as a leading provider of computer and presentation equipment rental. We are able to offer the latest specified equipment for short or long term hire, no matter what the quantity. This is ideal for users who require equipment at short notice for hotel, conference and training venues or for customers who trial a project or need equipment for a limited period only. Our aim is to provide you with the flexible choice.

Even for longer periods you may find rent is ideally suited and there are big savings for long term contract users. You also have to consider that all the equipment is fully maintained for the hire period supported by our parent group JCS Computing.

our standards

All our hire equipment is of the very highest standards and specification. We only rent leading computer brands.

Our equipment is rigorously checked prior to each hire and installed with the latest system updates for optimum performance, reliability and security. Our computers are all protected by F-Secure world leading security software.

We will deliver the day prior to commencement of the hire period and collect the day following completion of the hire anywhere on the UK mainland. This ensures you have the hire for complete day periods. For the duration of the hire you have the full backup and support just one phone call away.

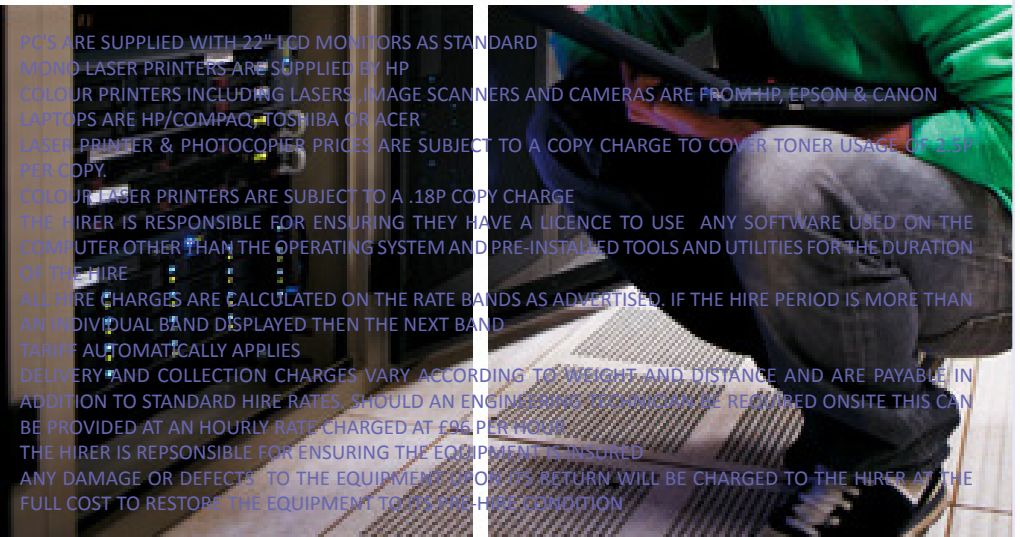

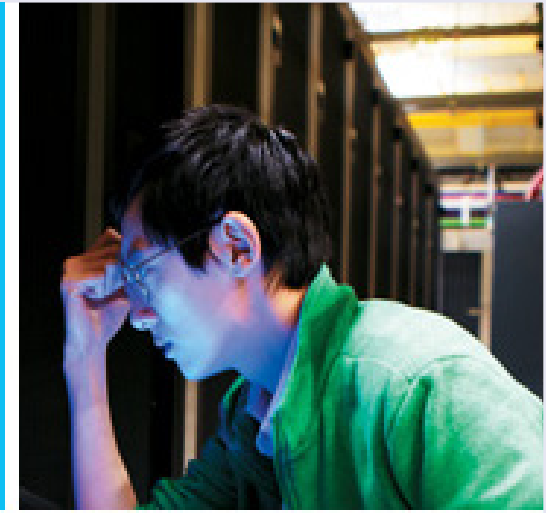

Computerent.co.uk, as part of the JCS Computing Group have technical experts on hand 24 hours a day.

Our policy is to deliver quality, service and value for money which is why we offer large savings on multiple day hires.

hire our mobile classroom

2U

Our highly successful mobile class has proved to be an enormously popular choice for clients who want to provide training either on their own site or at an external venue but do not have the equipment available.

We can offer any number of personal laptops fully configured and ready to use for your training course and complete with a projector and screen if required.

In partnership with our sister company JCS training we also have access to one of the most comprehensive bank of software trainers available so we are able to offer an all inclusive solution.

You simply just choose what you need and we will deliver, setup and collect at the end of the course as required.
